Army Burnhall College for Boys

03/2014 - 03/2016

Abbottabad

## WORK EXPERIENCE

### Backend Developer

Locomottv

02/2022 - 06/2022

Locomottv is a web based distribution management system, where you manage your one or multiple distributions. You can manage your inventory, Place your orders for your customer, see all your receipts and Reports about your daily or monthly sales. Using Locomottv you can also see how much taxes you have paid during the course or how many discounts you have applied to items or orders, even you can apply promotions to items as well. <https://locomottv.com>

#### Achievements/Tasks

- Worked on the Django platform for creating RESTful API for Distribution, Orders, Taxes, Items, Discount and other Modules.
- Learned Django REST Framework, Class Based View and PIP python package manager.
- Worked closely with the web development team and used Project Management tools like Slack and Asana for the development.

## PERSONAL PROJECTS

### Smart Donation System

- Smart Donation is a platform that has multiple ways of donating to the poor community i.e. Zakat collection and donation. To commence with, people can donate zakat to a Needy family, a Needy patient, or a Needy student through this platform. Information providers will give information about Needy people in their circle.
- The Admin and system will prioritize and verify the Needy people accordingly, then verified people will be shown to the Donor when he searches the Needy in his area.
- Developed in React JS, Bootstrap, Node JS, Express JS, MySQL and React Google Maps API.

### Final Year Project Management System

- My own Final Year Project. FMS is a complete portal for university students. Main modules of this application includes Student Registration, Coordinator Allocation, Group Allocation, Project Allocation, Supervisor Allocation, Assignments, Grading and Real Time Chat.
- Developed using React JS, Material UI, Express JS, MySQL and Sequelize ORM.

### DeRent

- DeRent is a product finding web Application. The Purpose of this application is to provide borrowers a good quality product. Through this application borrower can hire products and can communicate with Vendors through real time chat.
- Developed in React JS, Bootstrap, Node JS, Express JS, MySQL and React Google Maps API.

### React Js Clone Development Project

- Developing exact clones of famous websites like Netflix, LinkedIn and Facebook using React JS implementing design techniques used by the best developers, learning the finest crafts.
- Developed using React JS, Material UI, Next JS, Node JS, Express JS and MySQL.
