SUMMARY

Dedicated Software Engineer with a robust technical skill set and a strong academic background. Possesses extensive end-to-end experience in full stack web development across a variety of technologies. Passionate about continuous learning and innovation, staying current with emerging trends, and effectively solving complex engineering problems using cutting-edge solutions.

WORK EXPERIENCE

Self-Employed / Freelancer, Full Stack Developer 05/2023 – Present | Abbottabad, Pakistan

- Developed full-stack web applications using **Next.js, React, TypeScript, Node.js, and NestJS**, including dashboards, management systems, marketplaces, and business platforms.
- Built scalable **REST APIs and backend services** with NestJS, implementing authentication, authorization, DTO validation, and modular architecture.
- Designed and managed databases using **MySQL, PostgreSQL, Prisma, Supabase, and MongoDB**, including relationships, queries, and secure data access.
- Integrated **OpenAI APIs, payment systems, cloud storage, and third-party services** into web and mobile applications.
- Developed cross-platform **React Native applications** with TypeScript, integrating camera, media, authentication, and cloud services.
- Managed project planning and team collaboration using **Jira, Trello, ClickUp, Asana, and Slack**, coordinating tasks, development progress, communication, and project delivery.

Geeks Hub, Backend Developer 09/2022 – 04/2023 | Abbottabad Pakistan

- Developed and optimized scalable RESTful APIs using NestJS, Node.js, and Express.js, integrating MongoDB, MySQL, and PostgreSQL databases.
- Managed and fine-tuned databases with Prisma and Sequelize, ensuring high performance and data integrity.
- Integrated third-party APIs and collaborated with frontend and DevOps teams, leveraging Docker and AWS for streamlined deployment and enhanced application performance.

Mid-Chain Technologies, Backend Intern 06/2022 – 08/2022 | Lahore Pakistan

- Developed and implemented MongoDB models and database types to enhance performance and scalability.
- Executed transaction management to ensure data consistency and accuracy, including the development of REST APIs for seamless frontend-backend communication.
- Implemented Swagger documentation to streamline project efficiency and facilitate team collaboration.

PROJECTS

Scriptovate, *AI-Powered Screenwriting & Story Development Web Platform*

- Developed a responsive web application using **Next.js 16, React 19, Redux Toolkit, and Tailwind CSS**, automating Hollywood-standard screenplay formatting in real time, including **Scene Headings, Action, Dialogue, and Transitions**.
- Implemented dynamic **Courier 12pt PDF export, 3-Act and 5-Act emotional arc analysis**, and automated **film runtime estimation** based on dialogue-to-action density.
- Designed the **system architecture and ERD**, defining interactions between the Next.js frontend, **NestJS backend, PostgreSQL database, OpenAI LLM pipelines, role-based access control, and Stripe payment gateways**.
- Developed modular **NestJS REST APIs** for authentication, script drafts and versioning, scene element management, character management, story documentation, and collaboration permissions using **class-validator DTOs, custom guards, and JWT authentication**.
- Integrated **OpenAI APIs** for screenplay analysis across **10 narrative dimensions**, contextual next-scene generation, and character profile brainstorming, with resilient JSON parsing and exponential backoff retry handling.
- Designed **PostgreSQL schemas and relational entities** and implemented interactive features including a **drag-and-drop corkboard, line-by-line script commenting, in-app notifications, and collaborative permissions**.
- Integrated **Stripe subscription plans and AI credit metering**, enabling tier-based access and tracking of AI usage across the platform.

HealthScan, *AI-Powered Health & Nutrition Mobile Application*

- Developed a cross-platform **React Native mobile application** using Expo and TypeScript for **food scanning, nutrition analysis, health scoring, risk assessment, pollutant analysis, and personalized health recommendations**, including formula-based calculations for **Health, Nutrition, and Pollutants scores** and categorized insights across **Needs, Overview, and Risks**.
- Designed the **system architecture and ERD**, defining the interaction between the mobile application, NestJS backend, PostgreSQL database, AI processing, authentication, and media storage.
- Developed modular **NestJS REST APIs** for authentication, user profiles, health surveys, food scans, nutrition data, and health assessments with validation and protected endpoints.
- Integrated **OpenAI APIs** to analyze food images and user descriptions, generating structured JSON-based nutrition information and health insights.
- Designed **PostgreSQL database schemas and relationships** and implemented mobile interfaces including **Needs, Overview, and Risks**, with Health, Nutrition, and Pollutants scores.

Ordering Dashboard Solutions, *Restaurant Management & Ordering System*

- Designed and developed a comprehensive restaurant management system using **Next.js, Material UI, Node.js, NestJS, and PostgreSQL** to manage daily restaurant operations.
- Designed the **system architecture and Entity Relationship Diagram (ERD)**, defining core entities, relationships, data flows, and database structure.
- Implemented modules for **table management, order processing, menu management, inventory control, and billing**, providing centralized management of restaurant workflows.
- Designed and developed **RESTful APIs** using NestJS with a modular backend architecture for communication between frontend and backend services.
- Designed and managed **PostgreSQL database schemas and relationships** based on the ERD to support orders, products, inventory, tables, and billing operations.

Locomottv, Distribution Management System

- Developed and contributed to a **web-based distribution management system** designed to manage operations across multiple distributions.
- The system handled **inventory, orders, receipts, and sales reports**.
- Developed **RESTful APIs** for various modules using **Django REST Framework**.
- Implemented backend functionality using **Django Class-Based Views (CBVs)**.
- Used **PIP** for Python package management and project dependency management.
- Collaborated with the web development team using **Slack** and **Asana** for communication, task management, and project coordination.
- Strengthened practical experience in **Python/Django backend development and REST API implementation** through continuous learning and project implementation.

Bike - SNS, Motorcycle Social Networking Platform

- **Developed a scalable backend API** for a motorcycle social networking platform using **Node.js, NestJS, TypeScript, and MongoDB**.
- Built core community features including **social feeds, touring events, discussion forums, blogs, pagination, and user engagement**.
- Implemented secure **JWT authentication, role-based authorization, email verification, password recovery, and request validation**.
- Integrated **AWS S3, SendGrid, Stripe, and other third-party services** for cloud storage, transactional emails, and payments.
- Created **Swagger/OpenAPI documentation** and structured backend architecture with reusable modules, validation, error handling, and logging.

SKILLS		
JavaScript	TypeScript	React JS
React Native	Next JS	Node JS
Express JS	Nest JS	MySQL
Mongo	PostgreSQL	Prisma
Sequelize	Git/GitHub	Docker
Digital Ocean	Project Management Jira, ClickUp, Asana, Trello, Slack	

EDUCATION	
Abbottabad University of Science and Technology, Bachelors of Software Engineering	07/2017 – 06/2022 Abbottabad

LANGUAGES	
Urdu Native or Bilingual Proficiency	English Professional Working Proficiency
